## Wie gefährlich ist Ineos?

Geschrieben von dorli - 27.02.2008 03:27

---

Im Schaufenster vom 26.02.2008 heißt der Titelbericht „Wie gefährlich ist Ineos?“

Der Bericht versucht darzulegen das der Betriebsunfall bei Ineos vom 20.02.2008 auf die Sparmaßnahmen der letzten Jahre zurück zu führen ist.

Sicher dies kann eine Ursache sein. Aber ich kann mich gut daran erinnern vor zwei drei Jahrzehnten kamen solche Unfälle bei der damaligen Erdölchemie viel häufiger vor als heute.  
Damals gehörte die Erdölchemie zu beiden Teilen der BP und Bayer.

Was ich auch in dem Bericht vermissee, was ist mit den Sparmaßnahmen der Nachbarbetriebe die zu Bayer oder Lanxess gehören. Hier wurden in den letzten Jahren auch umfangreiche Sparmaßnahmen durchgeführt.

Hatte Ineos jetzt als erster Pech und es war nur der Anfang von chemischen Unfällen auf Dormagener Stadtgebiet?

Wie seht ihr das, schreibt mal eure Meinung dazu hier ins Forum.

Gruß dorli

Bei Berichten, die im Schaufenster stehen, muss man allgemein sehr vorsichtig sein. Es ist bekannt, wie das Blatt mit der Wahrheit umgeht. Die Skandale der vergangenen Jahre sind unvergessen, und nicht nur in Hackenbroich kann der Ortsvorsitzende Hans Sturm ein Lied mit vielen Strophen davon singen. Oder denken wir an die Behauptung, dass ulli Thiel als Kneipenwirt das Schaufenster gegründet haben soll! Bis heute hat sich niemand aus der Geschäftsführung oder der Redaktion dafür entschuldigt. Dass sich dieser Geist gewandelt haben soll, kann daher niemand annehmen. Als äußerste Vorsicht!
